## World Radiology Day

Celebrated annually on November 8, this day seeks to recognize the importance of radiology in healthcare, as well as the work of professionals in this field, including radiologists, radiology technicians, and medical physicists.

Radiology is essential to modern medicine, as it allows for the noninvasive diagnosis of diseases. Its specialties include X-ray, computed tomography (CT), magnetic resonance imaging (MRI), ultrasound, and nuclear medicine.

We remain steadfast in our commitment to provide medical care to the most underserved communities through our Free Medical Care Days. This month, thanks to our dedication and collective effort, we achieved the following:

- 4 localities in 2 municipalities of the state of Guanajuato
